This Office action is in response to Applicants' remarks received March 1, 2010.

Applicants' arguments have been fully considered and are deemed to be persuasive to overcome some of the rejections previously applied. Rejections and/or objections not reiterated from previous Office actions are hereby withdrawn.

Claims 5-8 are canceled. Claims 1-4 are currently under examination.

Priority: The request for priority to JAPAN 2002-328243, filed November 12, 2002, is acknowledged.

Objections and Rejections

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection.

Claim 1 has currently been amended to include the proviso that neither a sulfurous acid nor sulfite is added to the solution. Applicants point to page 3, lines 21-23 and page 4, lines 14-16 of the instant specification for support. The instant specification page 4 lines 10-15, discloses that the problems associated with known fractionation methods can be remedied by the addition

of a large amount of a sulfurous acid compound in a method for separating 7S globulin and 11S globulin. However, the instant specification does not appear to have explicit support for said proviso. The present invention proposes to solve the problems associated with the known fractionation methods by heat treatment under acidic conditions (p. 6 lines 18-21). Therefore, there does not appear to be explicit or implicit support for the proviso that neither a sulfurous acid nor sulfite is added to the solution containing soybean protein.

See also MPEP 2173.05(i). Any negative limitation or exclusionary proviso must have basis in the original disclosure. If alternative elements are positively recited in the specification, they may be explicitly excluded in the claims. See *In re Johnson*, 558 F.2d 1008, 1019, 194 USPQ 187, 196 (CCPA 1977) ("[the] specification, having described the whole, necessarily described the part remaining."). See also *Ex parte Grasselli*, 231 USPQ 393 (Bd. App. 1983), *aff'd mem.*, 738 F.2d 453 (Fed. Cir. 1984). The mere absence of a positive recitation is not basis for an exclusion.

In their response received March 1, 2010, Applicants have amended claim 1 to include the proviso that neither a sulfurous acid nor sulfite is added to the solution. Applicants further assert that the amendment overcomes the 103(a) rejection because Howard et al. disclose a method comprising using 0.05 mM to about 5.0 mM sulfite ion.

Response: The 103(a) rejection of the previous Office action has been withdrawn in view of Applicants' amendment.

However, the instant claims are rejected under 35 U.S.C. 112, first paragraph, written description, as reciting new matter. The reasons for the new matter rejection are noted above.

No claim is allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
